

MF TECNO PACKAGING SYSTEMS
MANUFACTURERS OF PACKAGING TECHNOLOGIES

THE COMPANY

Annual Turnover: € 30.000.000

Workforce: 170 employees

MF TECNO is an Italian company that has been operating in the packaging industry for over 20 years. The Massini brothers established this company to meet the high demand for packaging machinery detected by MIAL, MF TECNO's parent company, which has been operating in the animal feed industry for over 60 years.

ALL IN-HOUSE PRODUCTION

Thanks to continuous investments in Research & Development, we can offer the best packaging solution in order to be more competitive.

FROM THE BULK PRODUCT TO THE FINISHED PALLET

COMPLETE PACKAGING SYSTEMS

The wide range of machinery we produce allows us to design complete packaging systems. The MF TECNO automatic weighing, bagging, palletising and pallet wrapping lines are an integrated high-efficiency solution, with the aim of making things easier and supporting the customer in all the phases.

AD HOC CUSTOMIZATION

The control over each production phase allows us to customize any part of the plant in terms of performance, accessories and dimensions.

INDUSTRIES

Thanks to the high degree of flexibility, MF TECNO packaging solutions can be applied to the most diverse sectors of use: Food, Chemical, Feed, Pet Food and many others.

VERTICAL PACKAGING MACHINES (VFFS)

Small Formats
from 50 gr up to 5 Kg

Medium formats
from 5 up to 15 Kg

Big Formats
from 10 up to 30 Kg

Vertical packaging machines or VFFS form, fill and seal the bag starting from a reel of film.

FFS: FORM, FILL AND SEAL BAGGING MACHINE

*The **MF TUBE** FFS (Form Fill & Seal) Tubular machine was created to manage the packaging of free-flowing, powdery and granular products.*

OPEN MOUTH BAGGING MACHINES

The automatic bagging machines for open mouth bags are designed for packaging of bags with gussets from 5 up to 50 Kg.

Our IABA range, starts from the 600 bags per hour of the IABA 600S, up to 1200 bags per hour of the UNIVERSAL 1200.

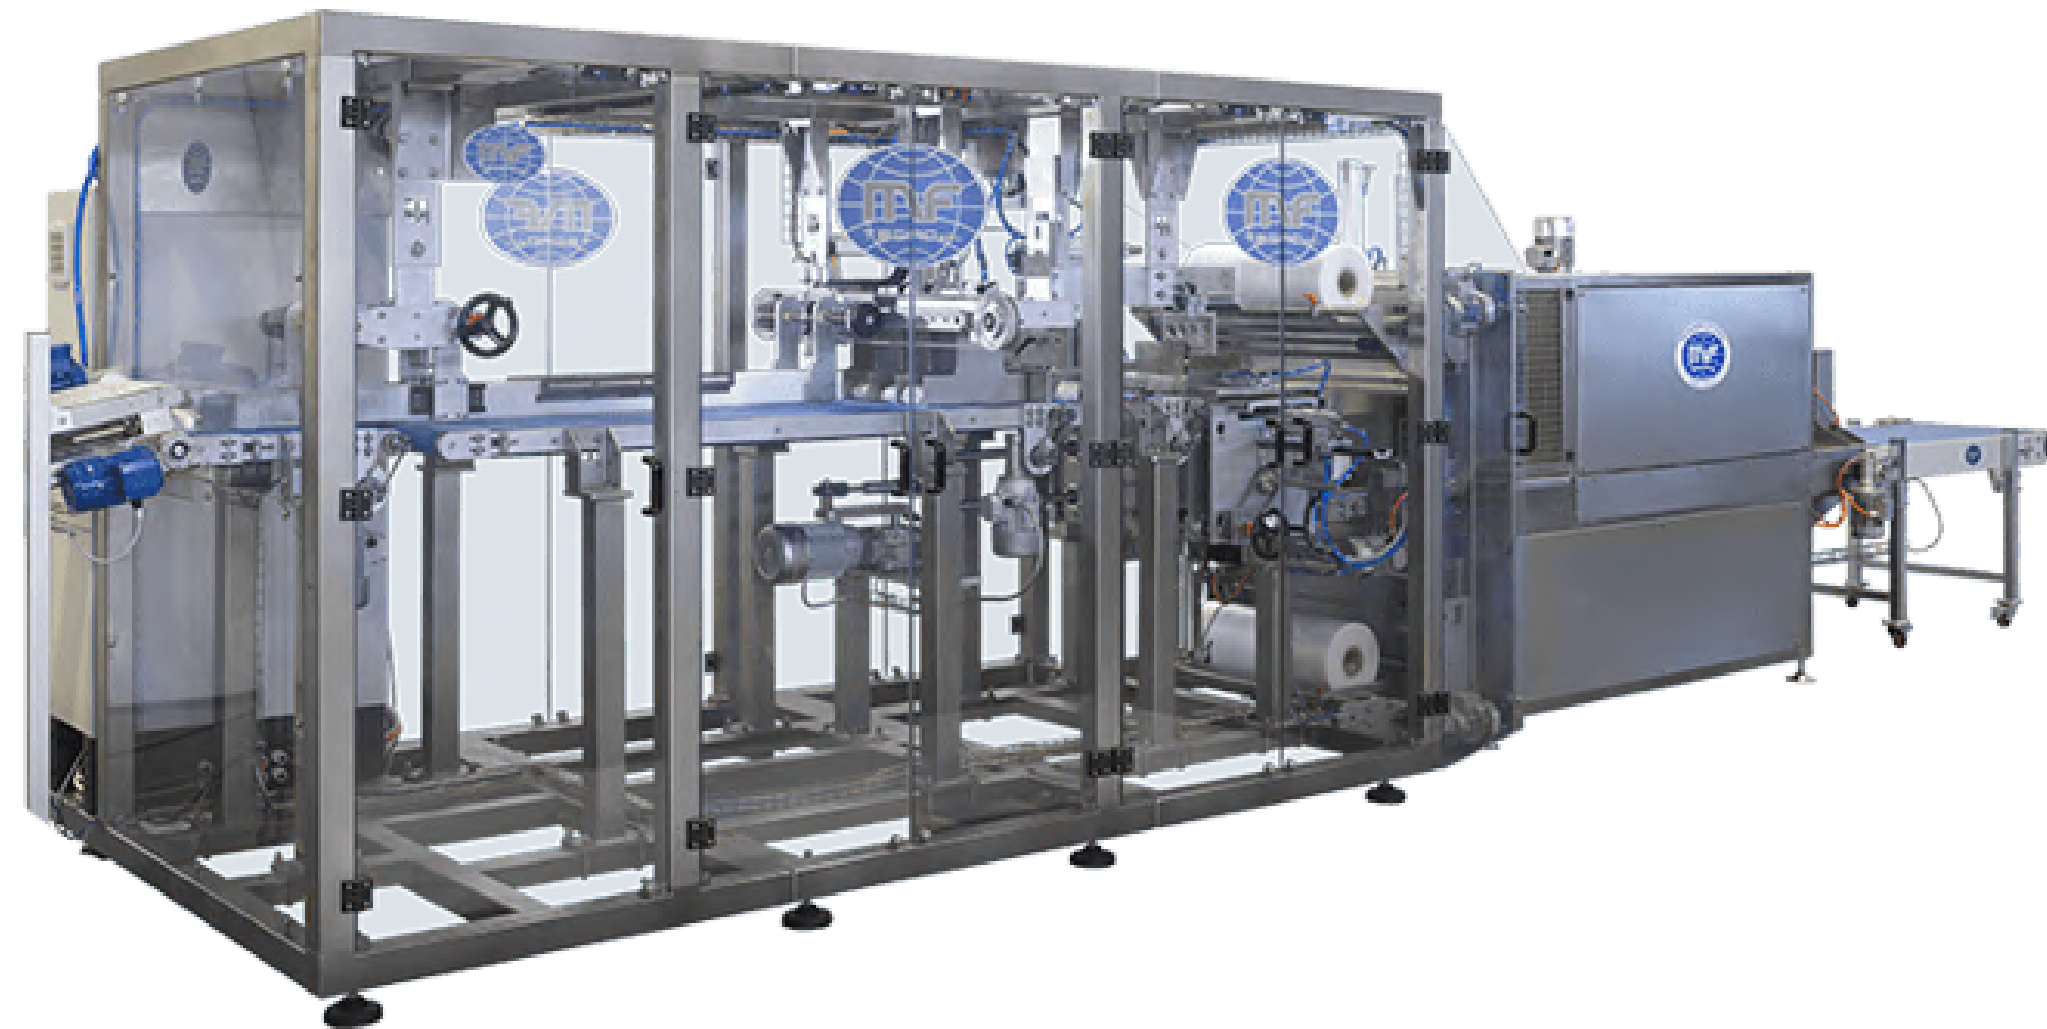

FLOW PACK HORIZONTAL PACKAGING MACHINE

*The horizontal **Flow Pack** is designed for the packaging of food products, consumer goods and industrial products.*

We supply flow packs with film reels from above or from below, and rotary jaws or box motion flow pack.

SECONDARY PACKAGING: SHRINK WRAPPERS

The shrink wrapper groups a given number of bags using a layer of shrink film. Depending on how the machine is fed, we can speak of a horizontal shrink wrapper or vertical shrink wrapper.

SECONDARY PACKAGING: CASE PACKERS

*Case packers are machines that form and close cardboard boxes.
The type of box managed is the one commonly known as the "American box".*

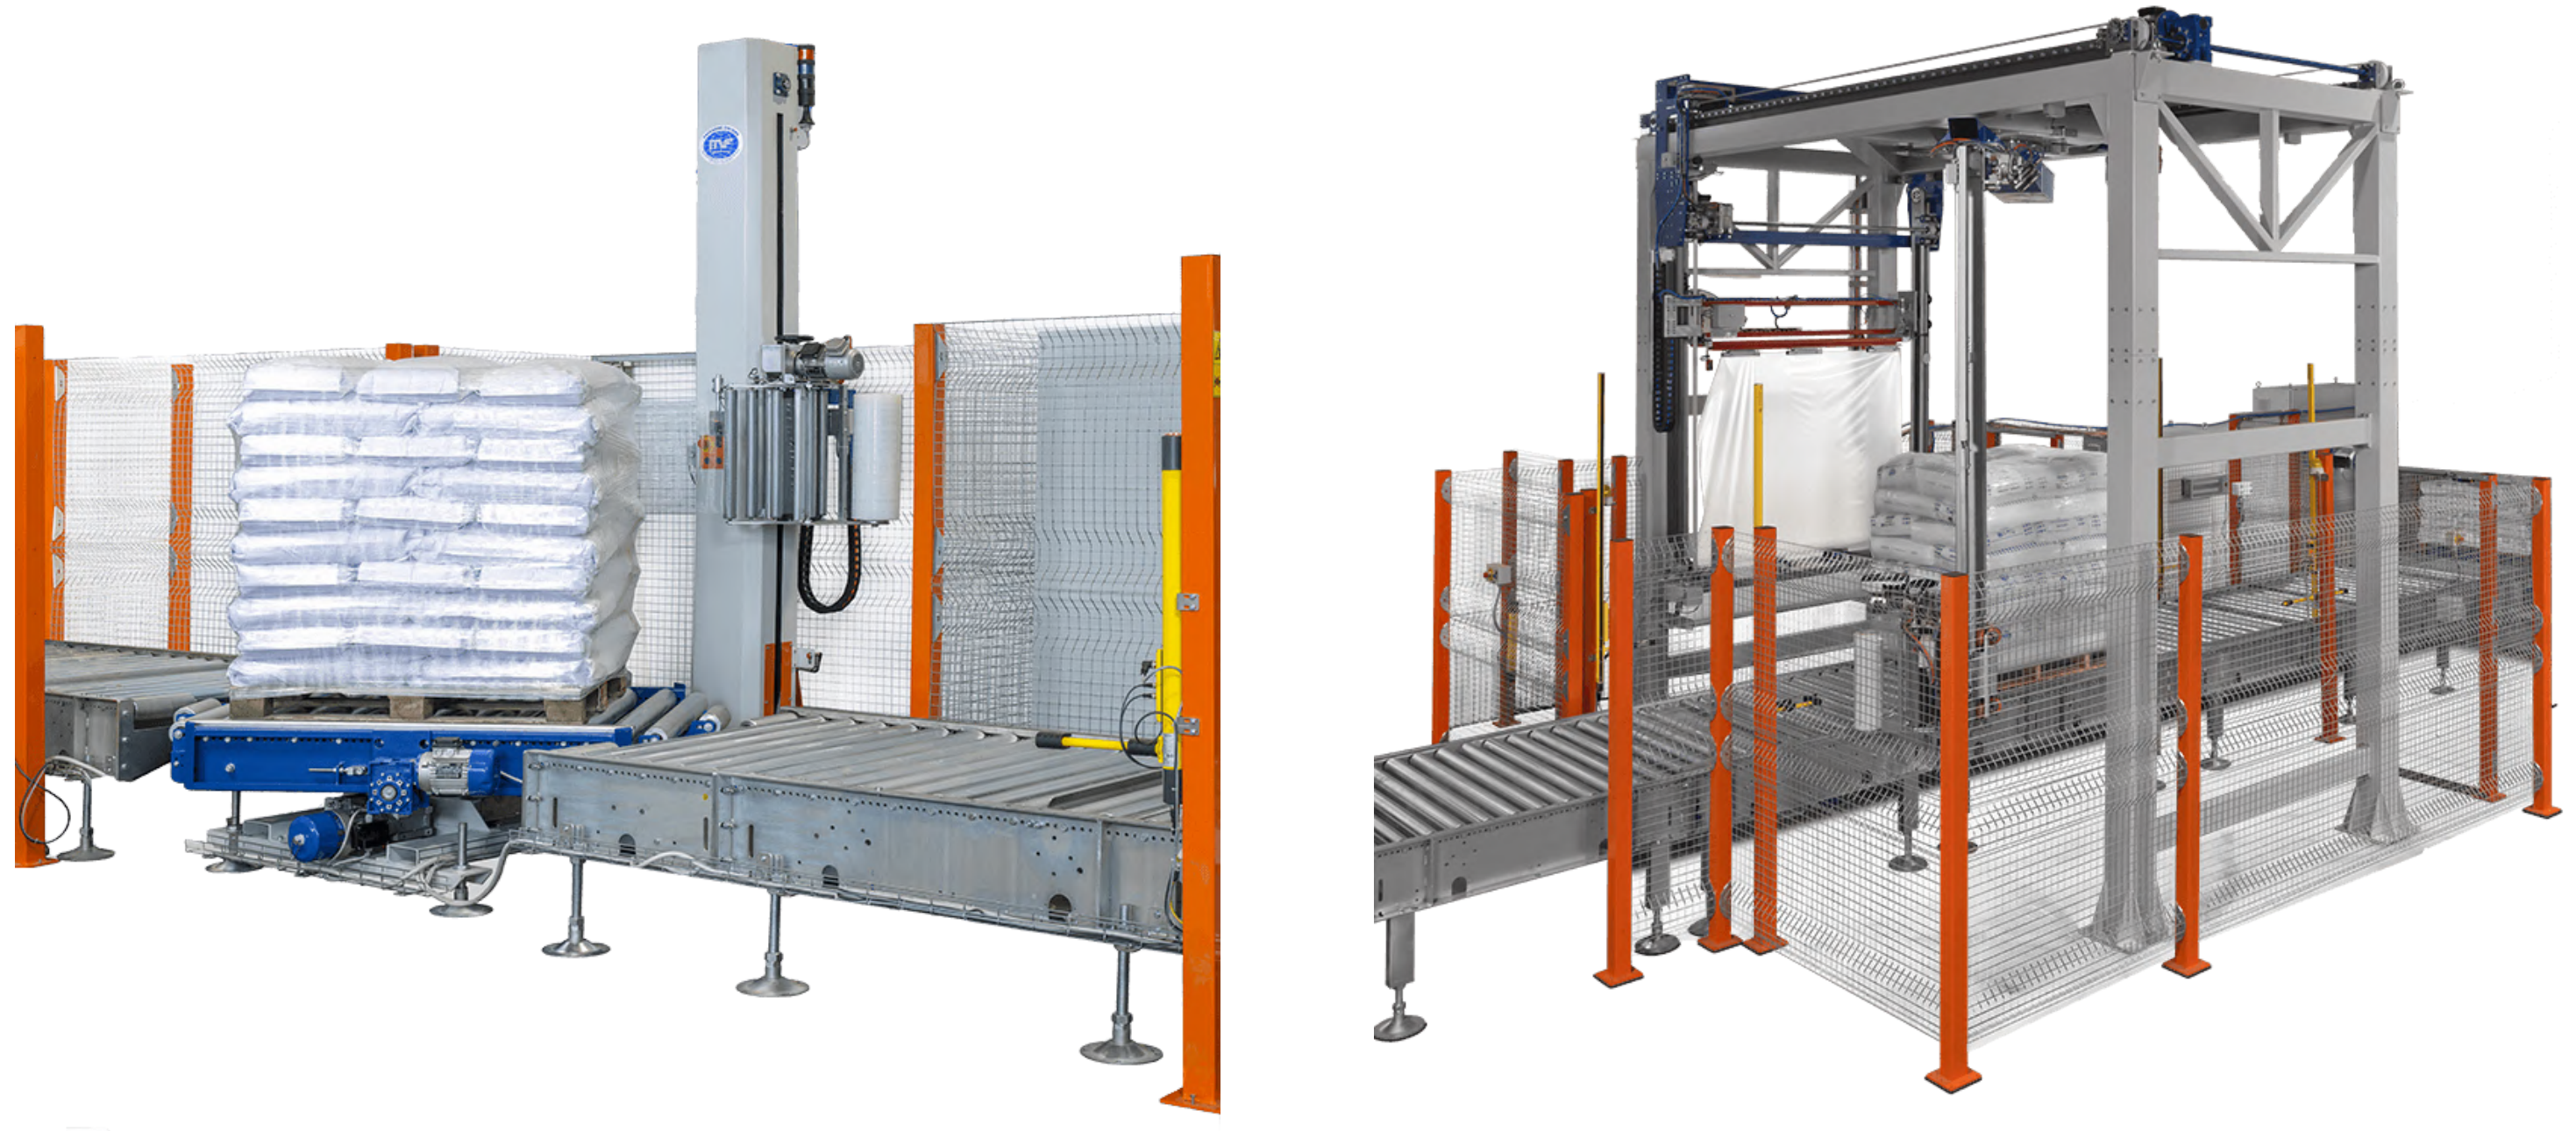

PALLETIZERS

A palletizer allows you to increase productivity by automating the process of sorting previously packed bags, boxes or bundles onto a pallet.

PALLET WRAPPING MACHINES

A pallet wrapping machine is used to protect the pallet from shocks and atmospheric agents.

ACCESSORIES

The high possibility of customization allows you to add various accessories to complete the pallet.

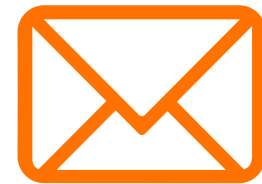

AFTER SALES

Our customers can count on a specialized and experienced team, dedicated to solving problems.
